

Report from Whitchurch Playground Working Group

Ken Hussey has conducted the first of his quarterly inspections and has also fixed the small climbing frame into the ground.

Two issues have come out of his inspection:

1. The benches are too near the fences so they need to be moved away and possibly fixed in place as they are relatively easy to overturn.

Recommended action: ask Dale Wright to move the benches and fix them down with immediate effect

2. The gate opens both ways resulting in hinges which could trap fingers. The cost for a new gate would be around £600 but Ken stated that there is no urgency to get this done.

Recommended action: research costs of gates but hold fire for 18months/2 years.
